

**Y-connect offers a family of High Density LC adapters that are available with a modularized multi-port dust shutter. Ideal for high density applications.**

---

Y-connect is introducing a family of singlemode and multimode high density LC adapter products that are available with a patent-pending modularized multi-port dust shutter. This product provides easy to use dust protection as well as eye protection for Class III A and lower lasers.

Duplex LC Adapter Mounts  
in SC Simplex Panel

Quad LC Adapter Mounts  
in SC Duplex Panel

The Duplex and Quad LC Adapter are designed with secure panel mount latching and are compatible with T.I.A. FOCIS 10B duplex and quad panel cutouts. This allows users to double connection densities using existing simplex and duplex SC adapter panel cutouts. The high density adapter and modularized multi-port dust shutters are available in MM, SM and APC. They are available in various colors: Blue, Beige, Aqua, Green and Black.

These products meet UL 94 V-0 flammability requirements and are fully RoHS compliant.

Y-connect, a wholly-owned subsidiary of Yazaki, is an innovator in fiber optic connectivity solutions. Our pioneering development and design team is based near Harrisburg, Pennsylvania and in Gotemba, Japan, with manufacturing in Hangzhou, China. Y-connect's environmentally stable, small form factor products include Unibody LC Connectors and Adapters, Patchcords, and a wide assortment of Fanout products.
